

ISO 27001:2013 Certification

Lex-Q is an accredited certification body which provides International Organization for Standardization (ISO) management system certification and Auditing services to organizations globally. As an accredited certification body, we certify our clients when they have successfully met the requirements of ISO 27001:2013. Our assessors are management system experts qualified in information security and other aspects of IT.

ISO/IEC 27001 is a part of a series of International Standards applicable to any type or size of organization, Implementing ISO 27001 in your organization is the right phase towards specifying that you can address the challenges and risks an efficient ways, you have an effective operational planning for the information security risk assessment and that you have established management and information security business continuity. This certification is an excellent frame work which helps the organization for managing and protecting valuable data and their information assets through best practice structure.

ISO 27001:2013 Audit Process

To gain and maintain an ISO/IEC 27001 certification the organization must go through regular 3rd party audits.

The Stage 1 audit is the first stage of the formal ISO certification audit. Stage 1 audit is carried out to review the ISMS document and processes. An auditor from Lex-Q certification body will visit your site(s) to review your management system policies and processes to confirm they cover all the requirements of the ISO/IEC 27001 standard.

In the Stage 2 audit Lex-Q auditor sees the operation of the management system. Lex-Q auditor will be looking at your operational records, objectives, management review records, internal audit reports, etc.

If the Lex-Q auditor is convinced with organization requirement and operating an effective management system which ensures compliance with regulations. The Stage 1 and Stage 2 audits assess your intent, implementation and management system effectiveness. An accredited ISO certification will be issued after successful certification audit.

An accredited ISO certificate is granted for three years, subject to maintaining your compliance. The scope of certification and renewal date are stated on the certificate. Once Lex-Q awarded your ISO certification, your organization is required to undergo regular surveillance visits to follow the continual improvement.

At the end of the three years you will be required to go through a re-certification audit.

At the end of the Audit, Lex-Q Auditors will provide you with an assessment report including an executive summary. Which states the continual improvement opportunity of your management systems. Following a successful assessment, you will be awarded a certificate.
